

WaveFrame Version 6.53 Released !!

To: All WaveFrame Customers

RE: New Version 6.53 Release

Date: August 21, 2000

Dear WaveFrame Customer,

We are happy to announce the release of WaveFrame 6.53. This version provides some new features and fixes including:

- **Transfer of DEVA Broadcast Wave files adds Scene and Take info**
- **mSoft (Wave) Player auto-transfer option broken - FIXED**
- **Destination folder name field entries crash Transfer SoundFile - FIXED**
- **Converted .WAV and .SD2 files always loop while auditioning - FIXED**
- **File..Retrieve while playing disabled – warning added**

... and about 30 other fixes and enhancements introduced in v6.52 !!!

We highly recommend you upgrade to this new version immediately. The 6 installation disks can be downloaded from our website at www.waveframe.com. Just follow the links under the Downloads tab. You can also download the release notes and we recommend you read them to thoroughly understand v6.53. (release notes are always on disk 1 and placed in your WaveFrame folder during installation). While you're on our web site, please take a look at the Technical Memo documents under the Support tab if you have not already done so. We are planning on using the Internet much more extensively to communicate with everyone so you are encouraged to check the site regularly.

If you are still running 6.1x or 6.2x, please contact your local WaveFrame dealer or Advanced Systems Group at 510-654-8300 to purchase 6.53. (**Version 6.5 required an updated SAM key** that will be sent with your order.)

***** IMPORTANT *****

Please read the version compatibility section of the Release Notes if you are upgrading from version 6.5 or 6.51!!!

We look forward to your comments about this new version. Thank you for your continued commitment to the WaveFrame product. Please contact WaveFrame 6.53 support at 760-602-WF65 (dhart@waveframe.com) or Advanced Systems Group at 510-654-8300 for further information.
